

**ETIRA**

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO

Mertect® 340-F

EPA Reg. No. 100-889

EPA SLN No. ID-040012

For Control of Seedborne Ascochyta Blight (*Ascochyta rabiei*) in Seed Peas for Export

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standards, on the EPA-registered Mertect 340-F Fungicide label.

This label must be in the possession of the user at the time of pesticide application.

Mertect 340-F fungicide is used to effectively suppress seed borne Ascochyta blight cause by the pathogen *Ascochyta rabiei*. Mertect 340-F seed treatment is used to minimize the threat of highly infectious seed-borne *Ascochyta rabiei* pathogens and limit the spread of residue-borne and wind-borne infection of seed peas by the pathogen.

Seed Peas (For Export Only): To aid in control of seedborne Ascochyta Blight (*Ascochyta rabiei*): for ready mix or slurry treaters, mix 1.02 fluid oz of Mertect 340-F fungicide in adequate water to provide complete coverage and apply to 100 lbs. of seed. Keep dispersion under constant agitation. It is essential that thorough coverage of seed be obtained. Mertect 340-F may be mixed with other registered seed treatment products in accordance with the importing Nation's Phytosanitary requirements.

Seed Labeling: Treated seed must be labeled "For Export Only - Not to be sold or offered for sale in the United States." The U.S. Seed Act requires that treated seed be labeled with the following information:

This seed treated with Thiabendazole at the manufacturer's recommended rate.
Do not use for food, feed or oil purposes.

Seed treatment with Mertect 340-F Fungicide will not provide post-emergence protection of plants grown in or near infected fields.

Use with an EPA-approved dye that imparts an unnatural color to the seed.

Do not contaminate water by cleaning of equipment or disposal of waste material.
